

Magesh K Palani

Bengaluru, India | 18+ Years Experience | mageshpalani.in

SUMMARY

Senior Product Designer and UX Strategist with 18+ years of experience creating enterprise software, SaaS platforms, mobile applications, design systems, and digital experiences. Experienced with IBM and Dell, combining product strategy, UX research, interaction design, visual design, prototyping, and motion to solve complex problems. Strong track record of simplifying enterprise workflows, building scalable design systems, and translating ambiguous requirements into intuitive products.

EXPERIENCE

SENIOR PRODUCT DESIGNER / UX DESIGNER

IBM

Enterprise Product & Experience Design

- Led end-to-end UX and product design across complex enterprise software, SaaS, workflow, cloud, and quality-management products.
- Translated complex business processes into intuitive user journeys, information architectures, workflows, and interaction models.
- Conducted heuristic evaluations, UX audits, usability analysis, prototyping, and design validation.
- Designed and evolved scalable enterprise design systems, reusable components, and interaction patterns.
- Collaborated with product managers, engineers, business stakeholders, and leadership to drive product decisions.
- Restructured information architecture across an enterprise platform with 1,000+ pages.
- Contributed to an engagement-management product associated with \$543K+ in recovered value.

PRODUCT / UX DESIGNER

Dell

Digital & Enterprise Experiences

- Designed user-centered experiences for complex technology products and enterprise workflows.
- Worked across interaction design, visual design, usability, prototyping, and product experience.
- Collaborated with cross-functional teams to translate business and technical requirements into usable digital products.

INDEPENDENT PRODUCT DESIGNER & UX CONSULTANT

Selected work across SaaS, education, mobility, public services, workflow automation, productivity, and consumer applications.

- Designed The Mystic Bamboo, a digital music-learning platform that achieved 918 subscriptions in its first year.
- Designed Namma Transit, a public transportation experience focused on multimodal journey planning.
- Designed Jan Seva, a digital grievance-management platform for public representatives.
- Designed workflow, project-management, learning, customer-success, and enterprise applications.
- Developed product concepts, design systems, prototypes, UX strategies, and visual storytelling experiences.

DESIGN APPROACH

Discover → Define → Design → Prototype → Test → Refine → Scale

Combining user needs, business goals, technology constraints, and systems thinking to create products that are clear, scalable, and meaningful.
